2<sup>nd</sup> August 2024

Resident,

The parish council is writing to inform you about the present situation with installation of an MVAS motorised vehicle activated sign. This is the device that records vehicles speeds.

The Parish council wishes to use lamp post column 7 on Acresford Road Donisthorpe to hold an MVAS. The Parish Council has worked with Leicestershire County Highways to find a spot for the post that both find acceptable and that are within the lines of the highway legislation.

The plan attached is the lamp post approved by highways to hold the MVAS. Before we can install the MVAS in this position, we need to check that the flashing will not disturb any resident..

The sign will say 'Thank you' & the speed' or 'Slow down' & the speed.

This MVAS collects data for the parish council to support the need for further speed enforcement.

The MVAs will not be facing one direction for more than 6 weeks. Evidence shows that an MVAS stops having impact if left in one position for longer than this. The long-term aim is to move several MVAS machines around the parish collecting data.

If you have any concern, please contact the parish manager at the above email address or telephone number.

If we do not hear from you by 30<sup>th</sup> September, we will move forward with the installation of the MVAS.

Kind regards

Oakthorpe, Donisthorpe & Acresford Parish Council
