October 2024

Resident,

The parish council is writing to inform you about the present situation with installation of an MVAS motorised vehicle activated sign. This is the device that records vehicles speeds.

The Parish council wishes to install a post on Ashby Road to hold an MVAS. Due to health and safety reasons the present lamp post identified is not suitable for ongoing use. The Parish Council has worked with Leicestershire County Highways to find a spot for the post that is acceptable and within the lines of the highway legislation.

The photo attached is the area approved by highways to install a post to hold the MVAS. Before we can install the post and MVAS in this position, we need to check that the flashing will not disturb any resident..

Like the present MVAS the sign will say 'Thank you' & the speed' or 'Slow down' & the speed.

This MVAS collects data for the parish council to support the need for further speed enforcement.

The MVAs will not be facing one direction for more than 6 weeks. Evidence shows that an MVAS stops having impact if left in one position for longer than this. The long-term aim is to move several MVAS machines around the parish collecting data.

If you have any concern, please contact the parish manager at the above email address or telephone number.

If we do not hear from you by 25th October, we will move forward with the installation of the post to hold the MVAS.

Kind regards

Oakthorpe, Donisthorpe & Acresford Parish Council
